Mr. James Osugi
889 S. Rainbow Blvd. Suite 137
Las Vegas, NV 89145

Dear James,

After evaluating, researching and personally seeing the outcome after using Siberian Chaga, I am pleased to inform you that the Women and Cancer Fund will be supporting the promotion of the product.

We will be using Chaga in major studies outside of the United States as well as in the clinics we are presently developing in the Indian Reservations of the USA. As you know, Indian reservations have their own governmental jurisdiction. Our first Life Center will be located in the Salt River-Pima Indian Reservation (Scottsdale, AZ.) We are not only looking at Chaga but other protocols that can quickly affect diabetic patients. We recommend Chaga as a disease prevention and immune system enhancer at the moment. The studies will go deeper into each particular disease.

We have done preliminary small studies with the product you donated to our charity. Chaga is indeed an outstanding product. We will start a study in Brazil in the spring and we expect to start a second study in Argentina shortly after. The size and length of the studies will be determined by the availability of funds.

I am looking forward to working with you and creating a venture that will greatly benefit all concerned.

Cordially yours,

Dr. Alicia Alvarez
Women and Cancer Fund
